

Name of CTC Partner  
Federal Emergency Management Agency  
Cooperating Technical Community  
Mapping Activity Statement

**Agreement agreement #- Digital FIRM Maintenance**

In accordance with the Cooperating Technical Community (CTC) Memorandum of Agreement dated insert date between the name of CTC partner and the Federal Emergency Management Agency (FEMA), Agreement agreement # is as follows:

- 1. Objective and Scope:** The objective of this Mapping Activity is the maintenance of Digital Flood Insurance Rate Maps (DFIRMs). This Mapping Activity covers the maintenance of insert # DFIRM panels for the community(s) of insert community names. Revisions to the DFIRM made through FEMA Letters of Map Change (LOMCs) issued since the insert effective FIRM date will also be incorporated.
- 2. Period of Performance:**  
*{For Locally Funded Agreements}* This Mapping Activity will begin on Insert Start Date and end no later than Insert End Date. This Mapping Activity may be terminated at the option of FEMA or Insert CTC Partner Name in accordance with the provisions of the Insert MOA Date CTC Memorandum of Agreement.  
*{For FEMA Funded Agreements}* The period of performance will be in accordance with Agreement Article II.
- 3. Funding/Cost-Sharing:** Summarize any funding provided by FEMA and/or cost-sharing arrangements with the community. This section can be marked "not applicable" for locally-funded Mapping Activities.
- 4. Standards:** The following documents are relevant to the maintenance of DFIRMs and this Mapping Activity:
  - *Guidelines and Specifications for Study Contractors* (FEMA 37) available via the internet at [http://www.fema.gov/mit/tsd/EN\\_reg.htm](http://www.fema.gov/mit/tsd/EN_reg.htm).
  - *Guidelines and Specifications for Flood Map Production Coordination Contractors* (Draft February 17, 1999).
  - *Base Map Standards for DFIRMs* (FEMA). This document provides minimum base map standards for DFIRMs. These include the following requirements for DFIRM base map data:
    - cover the community(s) or county(s) completely;
    - be distributable by FEMA to the public;
    - meet the minimum accuracy requirements outlined in the document; and
    - include all required features.
  - *Digital Flood Insurance Rate Map (DFIRM) Specifications*. (FEMA is in the process of developing specifications for its new DFIRM product. Once those specifications are complete, they will apply to this Mapping Activity.) This document will provide

information about graphic specifications for hardcopy DFIRM products as well as minimum standards for the DFIRM database that accompanies the mapping files, file formats, transfer media, etc. The “Basic DFIRM” tables and items in the DFIRM database apply; optional tables and items are not required.

- *Standards for Digital Orthophotos* (U.S. Geological Survey, National Mapping Program, December 1996).
- *Content Standards for Digital Geospatial Metadata* (Federal Geographic Data Committee, 1998).

**5. Products:** Insert Name of CTC Partner shall make the following products available:

- Quarterly status reports which include the percentage of work completed for this Mapping Activity, major accomplishments made during the quarter, any major problems encountered, and the resolution of any major problems encountered.
- DFIRM mapping files in one of the GIS file formats specified in FEMA’s *Digital Flood Insurance Rate Map (DFIRM) Specifications*. These files should be submitted on CD-ROM.
- DFIRM database files in one of the database formats specified in FEMA’s *Digital Flood Insurance Rate Map (DFIRM) Specifications*. These files should also be submitted on CD-ROM.
- Metadata files describing the DFIRM data must be provided. These files must include the required information and follow the examples shown in FEMA’s *Digital Flood Insurance Rate Map (DFIRM) Specifications*.
- A complete set of plots of the revised DFIRM panels showing all detail at the scale(s) approved under the first milestone must be provided. Acceptable DFIRM scales are 1"=500', 1"=1000', and 1"=2000'.
- A Quality Assurance/Quality Control (QA/QC) report that includes a description and the results of all automated or manual quality assurance steps taken during the preparation of the DFIRMs must be submitted.

**6. Schedule and Milestones:**

**Milestone 1 (Initial Review):** Upon completion, products for the first milestone will be provided to the FEMA Project Officer. These include:

- A detailed inventory of all DFIRM maintenance needs;
- A description (if necessary) of the proposed DFIRM base map including digital base map information checklist (available in FEMA 37);
- A diagram (if necessary) showing the proposed DFIRM panel layout for the new panels that includes the community and/or county boundary(s) and scale of all panels;
- A copy of the current FIRM index; and
- QA/QC report.

**Milestone 2 (Final Products):** Upon completion, final products will be provided to the FEMA Project Officer. These include:

- A set of digital files containing all DFIRM data for the entire community(s) and/or county(s) defined in Section 1 of this Mapping Activity Statement. The digital files will include the base map data as well as all FIRM information converted to DFIRM format.
  - The mapping files will be accompanied by the appropriate DFIRM database tables described in FEMA's *Digital Flood Insurance Rate Map (DFIRM) Specifications*.
  - Metadata files describing the DFIRM data will be provided.
  - A complete set of plots of the DFIRM panels showing all detail at the scale(s) approved under the first milestone will also be provided.
  - QA/QC report.
- 7. Certification:** The DFIRM metadata files will include a description of the horizontal and vertical accuracy of the DFIRM base map and floodplain information.
- 8. Technical Assistance and Resources:** [name of CTC partner] may obtain copies of FEMA-issued Letters of Map Change (LOMC), archived engineering back-up data, and data collected as part of the Five-Year Mapping Needs Assessment from FEMA's Mapping Coordination Contractor (MCC)/Technical Evaluation Contractor (TEC). The MCC/TEC may be contacted at 1-877-336-2657 (FEMA-MAP). General technical and programmatic information can be downloaded from FEMA's Flood Hazard Mapping website ([www.fema.gov/mit/tsd/](http://www.fema.gov/mit/tsd/)). Specific technical and programmatic support may be provided through FEMA's MCC/TEC; such assistance should be requested through the FEMA Project Officer specified in Section 12 of this Mapping Activity Statement and may include:
- Preparation of a revised DFIRM panel layout and panel grid in electronic format;
  - Technical assistance in the form of training and technical guidance; and
  - DFIRM production tools, software, cell libraries, automated QA/QC tools, etc., that FEMA has developed for its own use.
- 9. Subcontractors:** Specify any contractors to be utilized by the CTC partner to complete the activity. Mark "not applicable" if none. Procurement of subcontractors using Federal funds provided as part of this Mapping Activity will comply with the requirements of 44 CFR 13.36.
- 10. QA/QC Procedures:** DFIRM data prepared for this Mapping Activity will be independently reviewed to ensure that the following QA/QC requirements are met. This independent review will be conducted by [insert name of entity to perform QA/QC review]. The procedures used may include a mixture of manual and automated QA/QC procedures:
- Complete data capture of all required DFIRM features will be assured.
  - Data capture without distortion (other than that resulting from the addition of horizontal control and/or edgematching) will be assured.
  - Topological fidelity of the DFIRM files will be assured. This includes assurance that the files contain no overshoots or dangles, gaps, node errors, label errors, or pseudo nodes and assurance that all area features are closed.
  - FEMA's horizontal and vertical accuracy requirements for DFIRMs will be met.
  - All internal edgematching between panels will be resolved. If applicable, edgematching between contiguous communities will also be resolved. This includes both "graphical"

mismatches as well as mismatches in engineering data portrayed on the DFIRM (e.g., floodplain widths, base flood elevations, etc.).

- Complete data capture of all required DFIRM database features will be assured. In addition, logical data encoding checks should be performed to assure consistency within the DFIRM database. For example, feature attributes will fall within the specified range and domain for that feature type.
- Hardcopy DFIRM will be legible and plotted at the scale(s) agreed upon after the first milestone of this Mapping Activity Statement.

#### 11. Reporting:

*{For Locally Funded Agreements}* Specify reporting requirements, if any.

*{For FEMA Funded Agreements}* Reporting requirements will be in accordance with Agreement Articles V & VI.

**12. Points of Contact:** The FEMA Project Officer is name of FEMA PO and the CTC's Project Manager is name of CTC PM, or subsequent personnel of comparable experience who are appointed to fulfill these responsibilities.

Each party has caused this Mapping Activity Statement to be executed by its duly authorized representatives.
